Parents are often surprised by the quality and the depth of their child's memory and observation, and many are beginning to recognise that the best time to learn is when everything is new and therefore important to the child.

Here is a series of six books designed to help parents to amuse, interest and at the same time to teach. *Shapes, Colours* and the Ladybird *abc* each have their part to play in bringing the child to an early understanding of the reading process; *Counting* teaches him to recognise and understand simple numbers, and *Telling the Time* shows him how to relate the time on a clock face to his everyday life. *Big and Little* deals with the words which describe relative sizes and positions, all shown through objects and scenes which will be familiar to the young child.
